Hi Ravi,
cc: Shibata Sensei

The first draft looks good. Please find my comments along with this mail. Two major comments are:

1) Please explain your proposed algorithm as shown in Figure 3 in Section 4 and move explanation about experimental setup to Section 5. Please move any explanation that is related to your algorithm to Section 4.
2) Please combine Section 5 and 6. Explain the experiment that you have conducted and then present the results immediately. Please do not separate them into 2 sections.

Thank you,
Nishanth
